

**WIRELESS BROADBAND SOLUTIONS**

VISLINK GROUP

# Complete Integration Solutions

- Turn-Key / Design Build
- Site Surveys & Path Engineering
- Strategic Planning & Project Management
- Frequency Coordination & FCC Licensing
- Construction Services & System Implementation
- Final Testing & Preventative Maintenance

# Professional Planning & Consulting

For nearly two decades, WTS, a member of the Vislink group of companies has been providing complete wireless and broadband systems and solutions throughout the United States, Canada, Mexico & South America.

Our full range of integration and technical services has been used by enterprise business, local, state & federal government, as well as various branches of the US military.

Whether your requirement is for terrestrial point-to-point or point-to-multipoint microwave, optical fiber, or structured cable solutions, WTS can provide the most appropriate and reliable solution for video, voice, Ethernet, T1 to OC3.

Our professional staff includes factory trained/certified engineers and technicians, as well as installation crews who are trained, certified and compliant to all OSHA required RF site safety and fall protection standards.

# Wide Array of Technologies

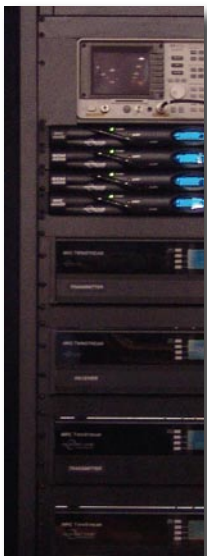

- Terrestrial Microwave
- Optical Fiber Systems
- Point-to-Point
- Point-to-Multipoint
- Data / Voice / Video
- LAN / WAN
- Fast/Gigabit Ethernet
- T1 / DS3 / OC3
- SONET / ATM
- In-Building BDA's

## SYSTEM INTEGRATION

WTS employs the most competent, courteous, knowledgeable and safest staff in the industry. Each member of our dedicated team strives daily to complete your project on-time and within budget. Our goal is to provide you with the highest level of craftsmanship and to exceed your integration expectations. Complete design-build solutions from one of the industry's leading system integrators.

## TECHNICAL SERVICES

Our respected technical services team is comprised of professional engineers and technicians with diverse industry backgrounds. Our years of "real world" field experience extends throughout the entire RF spectrum and includes many applications. You can always expect expert, factory trained personnel with the correct equipment and dedication to accomplish your needs.

Los Angeles

San Francisco

Tampa

Boston

WTS is member of a group of leading technology companies known as the Vislink Group. WTS has specialized in the design, integration and maintenance of wireless & broadband communications systems and solutions for nearly two decades.

Additional capabilities include RF video downlink systems for air-to-ground surveillance and electronic news gathering, high resolution fixed camera systems for traffic, weather and surveillance applications, Doppler radar weather systems and high-power television broadcast antenna and transmission line systems.
