MRC provides the ability to transmit video any time, any place. Our specialized video downlink technology delivers uninterrupted coverage regardless of environmental and tactical conditions.

MRC's field proven transmit and receive systems deliver a rock solid signal using the latest MPEG & COFDM technology with compatibility to popular GPS steerable antennas and camera gimbals.

MRC's HS-Series products provide the complete "air to ground" as well as "ground to air" solution for ensuring that central command stays informed ... no matter what the obstacle.

Take your department to the next level.

Summit . . .

[the highest point of attainment or aspiration]

We want our customers to succeed. That's why we create specialized solutions to help propel our customers to the pinnacle of their industry. Our latest antenna, the Summit 1 Meter, is the industry's first incline over orbit tracking terminal. Other important details include:

- 1 Meter Flyaway Antenna with multiple options for control system and feed arm
- Light Weight – 4 panel dish design for quick setup & tear down – single case storage
- GPS Auto Acquisition & Tracking – compatible with industry standard modems
- 35 years of state of the art design engineer experience with world wide tech support
- Dedicated system engineering and project support
